

## CALSULCO SULFUR FORMING UNIT UPGRADE

CLIENT - California Sulphur Company  
LOCATION - Long Beach, CA  
COMPLETED - 2015

### DESCRIPTION

In 2005 Matrix PDM Engineering was hired by California Sulfur Company to upgrade their original sulfur forming unit. The upgrade replaced an older unit, which had operated successfully for 25 years. This new unit, with a capacity of 2,000 tons per day, doubled the original capacity and was the first Devco II Sulfur Forming Unit. Matrix PDM's scope included engineering of the sulfur forming unit, as well as truck unloading and conveying. Additionally, Matrix PDM provided construction and start-up supervision and support.

### PRINCIPAL FEATURES

- Engineering
- Sulfur forming, truck unloading, and conveying
- Construction and start-up supervision and support
